

## **Xavier Calderon - Vice President of Business Solutions**

As Vice President of Business Solutions, J&A Global, Mr. Calderon is responsible for international software development, with specialization in graphic user interface paradigms.

Mr. Calderon has over a decade of experience in the information technology industry. He has solid experience in all facets of the software development cycle - from conception and design, through development, QA, and Support.

Prior to joining J&A Global, Mr. Calderon was the Level 2 Technical Support Manager for Computer Associates International. His experience includes not only the design and lead implementation of all user interface components, including a full featured object oriented disparate data source integration Development Environment - *Opal Integrator for Computer Associates* but also the creation and successful operation of a support and quality assurance department solely devoted to the *Opal* Product Line.

As Development Product Manager, Mr. Calderon led the architecture and development of *CA - Kiplinger's Simply Money*. This personal finance package, from Computer Associates, sold over 1.5 million copies. In addition, Mr. Calderon localized *Simply Money 3.0* for Canada and he created the Language Workbench to facilitate text normalization into Simplified English.

Previous experience as Senior Software Developer for QUE Software, a Macmillan Computer Publishing Company, includes a key role in the development of *RightWriter* for DOS and Windows. This grammar checker software product consistently won awards and sold more than one million copies.

Mr. Calderon holds a B.S. degree in Computer Science from the University of Central Florida. He is fluent in Spanish and resides on Siesta Key with his wife and two children.
